

DURATAACK PTNS

Clean labels contain no silicone.

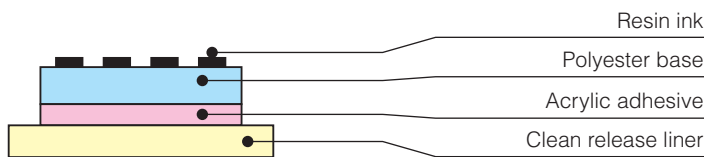

DURATAACK PTNS are clean labels that contain little or no silicone, outgas and ion impurities, and generate minimal dust and outgas from the liner.

Features

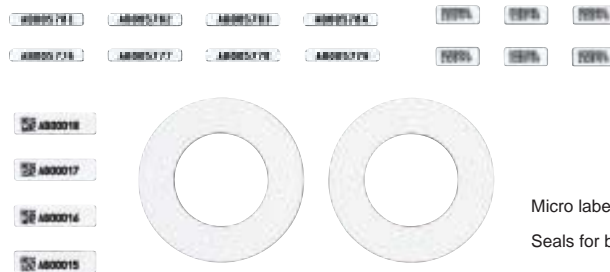

- Clean labels contain little or no silicone, outgas and ion impurities that can cause hard disks to crash.
- Labels can be produced right on the spot with a thermal transfer printer.
- A platen roller that contains no silicone is optionally available for DURAPRINTER SR and DURAPRINTER SRS.

Structure

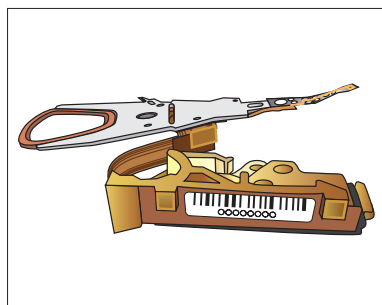

Applications

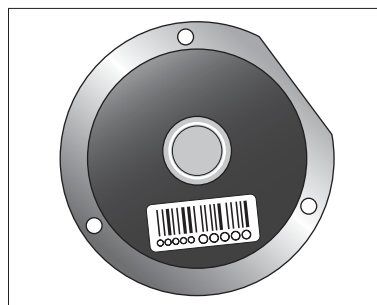

- Nameplate/display labels for electronic and communications equipment and components
- Process management labels for electronic and communications equipment
- Seals and labels for blocking holes in electronic equipment
- Labels for tray management

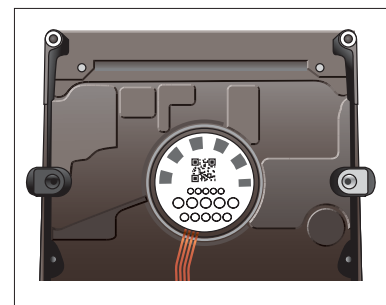

Micro labels also applicable
Seals for blocking holes
