

Dust Cleaning Tape

# ELEP CLEANER ELEP-P2500

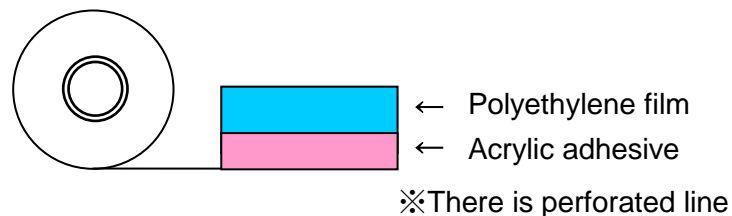

## Outline

---

In the production of electronic and display devices, it is extremely important to remove foreign material from surfaces. Then, we propose the roll cleaner which rolled the adhesive face of an adhesive film outward. You can use broadly the handy type which can do cleaning easily from the use of dust picking of a printed circuit board to the dust picking use at the time of inspection or shipment.

## Construction

---

## Features

---

- The dust removing performance is excellent, and a foreign material is firmly caught in a process.
- By removing the dirty field, it can be used in the beautiful condition at any time.
- There is dry edge and it is easy to rewind.
- Perforated lines are contained at the fixed interval, and cut performance is good.

## Application

---

- Cleaning of the surface of PCB
- Cleaning at inspection and shipment (before packaging) (mainly handy type)

## Standard Size

Table-1

Thickness (mm)	Width (mm)	Length (m)	Core Diameter ( $\phi$ mm)
0.07	80 160	10 20	38

\*For other sizes, please contact us.

## Properties

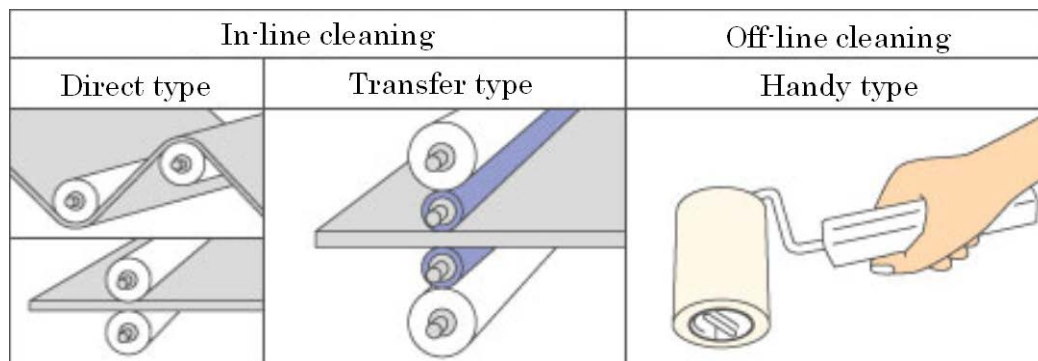

Table -2

Property	Unit	Values
Adhesive strength	N/20mm	1.80

※Measuring method: JIS Z 0237 : 2000

## General dust cleaning

Dust cleaning is mainly categorized into three types depending on materials and processes.

## Precautions

- Place the original roll of these products horizontally for storage to avoid deformation.
- Keep the products away from high temperatures and humidity, and store them in a dark cool place avoiding direct sunlight.
