

Double-coated adhesive tape

No.515

Outline

Nitto No.515 is Low VOCs double-coated adhesive tape using by solvent-free acrylic adhesive. Excellent bonding performance to various substrates such as reinforcement of interior fitting, metal and plastic.

Structure

As can be seen, we printed 「Nitro LowVOCs」 with the Release liner, have to be recognized as Low VOCs double-coated adhesive Tape.

* "Non-woven fabric" is classified under a law called Customs Act of Fixed Rate Chapter 48 "Paper and paperboard; articles of paper pulp, of paper or of paperboard".

Features

- Low (*) VOCs double-coated adhesive tape) (*) : Volatile Organic Compounds
- Thick type (As tape thickness is 0.25mm) , ideal for bonding of interior fittings reinforcement.
- Excellent Adhesion to substrates using by flexible non-woven fabric.
- The ten hazardous materials restricted by the RoHS directive are not compounded.

Applications

- Fixing of interior fittings reinforcement.
- Fixing of metal name plate.
- Fixing of plastic display plate.

Precautions when using

- Remove all oil, moisture and dirt from the surface of the substrate before applying.
- The tape employs pressure-sensitive adhesive. Be sure to apply pressure with a roller or press when applying. Failure to do so could affect properties or appearance.
- The tape may not adhere well to significantly uneven or distorted surfaces. Level off the surface as much as possible before applying.
- Avoid applying a large load to the tape for several hours following application.

Precautions when storing

- Be sure to keep the tape in its box when not using.
- Keep in a cool dark place not exposed to direct sunlight.

Safety precautions

 WARNING
<ul style="list-style-type: none">● Make sure the product is suitable for the application (objective and conditions) before attempting to use. The tape may come off depending on the substrate to or conditions under which it is applied.● Use in combination with another method of joining if there is possibility of an accident.
