

SCF(Super Clean Foam)

SCF400TT

Outline

SCF400TT is polypropylene foam material, which can be used as dust-proof, buffer, shock absorber, and light shield materials. This application is mainly for display gasket and shock absorber of electric appliances, communication equipments and other electronic equipments.

Construction

SCF400TT

← Polypropylene foam

Features

- As SCF400TT is the thinner-foam, it shows excellent flexibility even if it is used in a very narrow clearance.
- Thanks to its low compression stress, it will not deform the structures after application.
- It shows excellent conformability to gaps with bumps or curved surfaces.
- The environment impact material is not used and it has almost no impurities, which might contaminate the equipments.
- Due to the stiffness secured by its unique micro-cell structure, it shows excellent process ability and workability.

Application

- Electric appliances, electronic equipments: Dust-proof display gasket and lens buffer for digital camera and digital video recorder.
- Communication equipment: Dust-proof display gasket and camera lens buffer for mobile phone.

Precautions

- Please store it in the packing form when it is shipped.
- Keep the products away from high temperatures and humidity, and store them in a dark cool place avoiding direct sunlight.
- You should perform the test yourself to make sure the product is capable of the application.
